

RH1 RUBBER MATERIAL HANDLING HOSE

The Model RH1 is a heavier weight rubber material handling hose designed for a variety of slurries and dry highly abrasive materials throughout industry. It uses an FDA Grade, thick, smooth bore natural rubber tube for abrasion and age resistance with a steel wire helix, and a high grade SBR cover that resists scuffs and cuts.

The 5" - 12" diameters have extra kink resistance with a corrugated cover.

Temperature range is -20F to 180F.
